Loader characteristics

- Single mast allowing tool change in just a few minutes
- Malleable mast with 360° rotation
- Hydraulic unit 13 hp, 8 gpm
- A single machine for several uses
- Solid tool designed for big jobs
- Hardened steel axle stem
- Large bearing on the axes for greater solidity
- Tested steel structure
- 4000 psi hoses with very wear-resistant protective sheath and treated to resist UV rays
- 360° rotation
- The electric joystick type control system is height adjustable
- The clam is continuously rotating
- The grapple has a lot of clamping force, it can be used for wood, stone, hay, manure, iron, etc. Its design allows the intertwined wood to be well placed
- Very malleable mast, it lifts almost parallel to the support post for greater accessibility in tight places. It folds on itself very close to its base to facilitate front loading.
